

ROOFTOP SIGNALLING

TYPE DAKP3A6G of R of BL (YELLOW OR RED OR BLUE)

Same as DAKP3 but with 6 extra LED flash lights

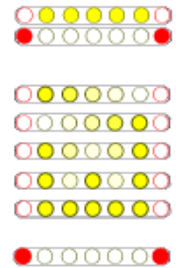

- Frame with reclinable signalling panel
Easily mounted on the roof rack of your vehicle (minimum 2 transverse bars) and equally easy to dismount
- Blinking or flashing LED luminaries, reflective sheeting and standard sign faces
- Control from the cabin of the vehicle
- The yellow or red or blue or yellow LED luminaries alternate
- The system works on 12 V or 24 V DC
- Can be used with the panel raised as well as with the panel reclined.

RECLINED

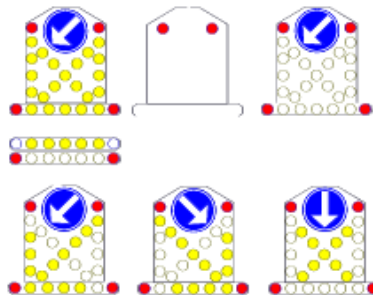

Pointing aft, the 5 yellow luminaries alternate with the 2 red or yellow or blue luminaries.

RAISED

Pointing aft, 22 yellow luminaries and 4 red or yellow or blue luminaries at the corners. Pointing forward, 2 red or yellow or blue luminaries

The yellow luminaries can work in different sequences

The round arrow sign rotates and points in the appropriate direction automatically

The panel is tilted by an electrical jack.

The system is entirely pre-programmed so operation is reduced to following the context menus and activating the function keys.

Control box mounted in your vehicle
